CLASS HYSTEROSCOPY:

WHERE
HYSTEROSCOPY MEETS
ULTRASOUND

In the last years, **integration** between **Hysteroscopic Surgery** and **Ultrasounds** has become fundamental. **Gynaecologists performing endoscopic surgery** should be able to perform **gynecological ultrasound** to diagnose benign and malignant diseases and also to guide some careful procedures.

The course aims to provide the necessary knowledge and practical skills to treat simple and complex pathologies under ultrasonographic guidance. The programme consists of **theoretical lessons**, **clinical cases** from **CLASS Hysteroscopy Center** and **hands-on-training sessions** according to the **ESGE GESEA Program**, using transvaginal simulators, ultrasound machines, hysteroscopic trainers (wet and dry lab, GESEA HYSTT 1 and 2 exercises).
