Scientific Directors:

Danilo Buonsenso (Italy) **Silvia Simò-Nebot (Spain)**

Dipartimento Scienze della Salute della Donna, del Bambino e di Sanità Pubblica
Fondazione Policlinico Universitario A. Gemelli IRCCS, Rome, Italy

SCIENTIFIC RATIONALE

The *PID GAMES* (Paediatric Infectious Diseases Games) in Rome are a new interactive educational event that will expand your knowledge in the field of paediatric infectious diseases.

The PID GAMES is a three-day course consisting of four modules on different exciting topics (e.g. one bacterial, viral, fungal and parasitic infection).

Each module consists of two lectures by experts from around the world, a pro/con debate and a real competition between the participants. The winner of these games wins a free trip to the next ESPID annual meeting.

FACULTY

Aguilera Alonso David, *Spain*

Buonsenso Danilo, *Italy*
